

Native Plant Monitoring Worksheet

Fill in this chart to keep track of the native plants on your property each season. This worksheet will help you monitor the native plants that grow on your property naturally, as well as the ones you plant yourself. Don't forget to take photos!

Season	Name of native plant(s)	Location on your property	Number of plants, or approximate % that covers your property	Notes (e.g. general health condition of the plant, signs of wildlife activity, rapid or slow growth rate, etc.)
Early spring (end of March – mid April)				
Spring (mid April – mid June)				
Early summer (mid June – mid July)				
Mid summer (mid July – Mid August)				
Late Summer (mid August – mid September)				
Autumn (mid September – mid December)
